

## **CPixels**

# **WhitePaper**

CPixels is **not just another crypto project**—it is a **self-sustaining, revenue-generating ecosystem** that solves real problems in the crypto industry.

- **No Token Flooding – Controlled Supply**
- **Real Revenue Model – Earn from Ad Rentals**
- **Lifetime Passive Income – Community-Owned Pixels**
- **No Pre-Sale, No ICO – Sustainable Tokenomics**

By combining **digital advertising, verified investor networks, and a controlled token supply**, CPixels is setting a new standard for **crypto sustainability and passive income opportunities**.

## About CPixels

CPixels is an innovative **crypto collaboration hub** and **advertising platform** that integrates verified investor networking, revenue-sharing models, and an affordable advertising solutions. Unlike many crypto projects focused solely on speculative gains, CPixels provides a **real revenue model**, helping investors and projects connect meaningfully while ensuring long-term sustainability.

At the heart of CPixels lies a **unique digital advertisement screen**, composed of **one million pixels** that users can own and rent to crypto projects for advertising. This model not only ensures affordable and effective promotions but also provides **community-driven revenue-sharing opportunities**, where members earn monthly income from pixel rentals.

## Mission

Our goal is to create a **sustainable, community-powered crypto ecosystem** that provides long-term income opportunities through real utility and revenue models. We aim to:

- Bridge the gap between **crypto projects and verified investors**.
- Offer **affordable, transparent, and effective advertising solutions**.
- Establish a **lifetime revenue-sharing model** based on digital pixel ownership.

## Industry Problems & CPixels Solutions:

Problems in Crypto Industry	CPixels Solutions
Difficulty in finding <b>reliable investors</b>	A <b>verified Crypto Micro Investors Club</b> for secure connections
High advertising costs & <b>ineffective marketing</b>	Affordable <b>Crypto Digital Advertisement Screen</b>
Short-lived projects with no real <b>business model</b>	A structured <b>revenue-sharing economy</b> based on pixel ownership
Unsustainable <b>token distribution</b> causing price crashes	<b>Controlled monthly distribution without any IPO or pre-sale</b>
Lack of <b>community engagement</b> & long-term rewards	<b>Lifetime income model</b> for pixel holders

## CPixels Solutions

We're not building something overly technical, complicated, or years away from completion. Our idea is simple, ready to execute, and doesn't require users to just hold and wait.

CPixels is more than just a token or a quick-profit platform. It's designed to solve real problems in the crypto industry with a solid revenue model, offering valuable services to the crypto community.

### **1. WORLD'S FIRST CRYPTO MICRO INVESTORS CLUB** BUILDING A COMMUNITY OF VERIFIED CRYPTO INVESTOR

Crypto traders and enthusiasts often struggle to connect, while projects face difficulty finding reliable investors. The **Crypto Micro Investors Club bridges this gap** by providing:

1. A secure and trusted space for verified investors and traders to list themselves, connect with like-minded individuals, and exchange investment ideas.
2. Three exclusive private Telegram groups for focused discussions, insights, and collaboration, categorized by investment level:
  - Bronze Investors Club (10\$ – 99\$ Investors)
  - Silver Investors Club (\$100 - \$999 Investors)
  - Gold investors Club (+\$999 Investors)

#### **Benefits for Investors**

- ✓ Discover & invest in early-stage projects
- ✓ Access exclusive insights & expert discussions
- ✓ Secure long-term investment partnerships

## 2. WORLD'S FIRST CRYPTO DIGITAL ADVERTISEMENT SCREEN OFFERING AFFORDABLE ADVERTISEMENT SERVICE TO CRYPTO PROJECT

One of the biggest challenges in the crypto industry is that despite spending large amounts on ads and marketing, many projects struggle to connect with real investors. Instead, they often end up engaging with bots and giveaway hunters who provide no real value.

To solve this problem, **CPixels has created** an affordable and effective solution—our **Crypto Digital Advertisement Screen**.

### How it Works?

Our digital advertisement screen consists of **one million pixels**. Crypto projects can **rent these pixels** on a monthly basis for just \$1 per pixel and display their ads directly to our **verified community of crypto investors**. This system ensures:

- ✓ **Affordable marketing** for crypto projects
- ✓ **Direct exposure** to genuine investors
- ✓ **Real results** instead of bot engagement

### A Real Revenue Model with Profit Sharing:

Unlike other projects that rely on speculation, **CPixels has a real and sustainable revenue model**. We generate **monthly income** through: **Pixel rentals** (crypto projects paying for ad space). But instead of keeping all the profits, **we share our ad revenue with the community**—creating a **lifetime earning opportunity** for our members.

### Amazing Lifetime Earning Opportunity:

**PIXELS ARE OWNED BY COMMUNITY**

The most revolutionary aspect of CPixels is that our one million pixels are community-owned. This means that **community members** are not just participants—they **are our business partners**. These pixels offer amazing benefit and reward **in phase one** and a lifetime earning opportunity in **phase two** of our project.

**Each pixel has a fixed value of 1 USDT—always stable, always valuable.**

## Project Concept

We have divided our project in **two phases** based on tasks and each phase offers exciting rewards and benefits.

### Phase One

15 January, 2025 - 30th July, 2025 (6 Months)

<p><b>Road Map &amp; Major Task of Phase 1:</b></p> <p>In this phase, our primary focus is on building the community, distributing screen pixels to our members, launching the token, and introducing the SLE Jackpot.</p> <ul style="list-style-type: none"> <li>• Community Building</li> <li>• <b>Pixels Distribution</b></li> <li>• Token Launch</li> <li>• <b>Token Listing on Major DEXs</b></li> <li>• SLE Jackpots &amp; Other Reward Distributions</li> </ul>	<p><b>Benefits of Having Pixels in Phase 1:</b></p> <p>Pixels collected in phase 1 gives you benefits in two major ways:</p> <p><b>1. Get Monthly Airdrop Pixels Reward</b></p> <p>You can lock your pixels and get monthly airdrop reward on your pixels in phase one.</p> <p><b>3x your locked pixels in 6 months</b> pixel distribution.</p> <p><b>OR</b></p> <p><b>2. Convert to Token</b></p> <p>In phase one you can also convert your pixels to tokens and get early benefits from token's price appreciation.</p> <p>There are many other benefits of owning pixels in phase 1 those are mentioned below</p>
--	--

### Optional Conversion – 3x Your Pixels By Locking

Converting Pixel to Token is **optional**. Otherwise you can **lock your pixels** and get monthly pixel reward on your locked pixels, in phase 1.

## Phase Two

Starting from 1<sup>st</sup> August, 2025

<p><b>Roadmap of Phase 2</b></p> <p>Once all pixels are distributed among our community, we will move forward with Phase 2, which focuses on marketing and expansion.</p> <ol style="list-style-type: none"> <li><b>Marketing &amp; Outreach:</b> <ul style="list-style-type: none"> <li>We will begin <b>approaching Web3 and crypto projects</b>, offering them the opportunity to rent pixels on our digital advertising screen.</li> <li>Our <b>verified crypto enthusiast community</b> will be the target audience, ensuring that the ads reach genuine, engaged investors.</li> </ul> </li> <li><b>Advertising Service for Projects:</b> <ul style="list-style-type: none"> <li>We offer <b>affordable advertising</b> to crypto projects through our pixel rental service.</li> <li><b>Projects can rent pixels</b> on a monthly basis, with the option to rent as many pixels as they need according to their <b>budget and promotional needs</b>.</li> </ul> </li> </ol> <p>Each pixel will be rented out at <b>1 USDT per month</b>.</p> <p>This model not only supports projects in reaching a targeted audience, but also provide <b>ongoing revenue for the community</b>, creating a sustainable &amp; beneficial ecosystem.</p>	<p><b>Benefits of Having Pixels in Phase 2:</b></p> <p>In Phase 2, owning pixels continues to offer valuable opportunities in two ways:</p> <ol style="list-style-type: none"> <li><b>1. Convert to Token</b></li> </ol> <p>Even in Phase 2, you have the <b>option to convert your pixels into tokens</b>. This allows you to hold them as an asset or <b>cash out</b> your pixels</p> <ol style="list-style-type: none"> <li><b>2. Lifetime Monthly Income</b></li> </ol> <p>If you choose to <b>hold onto your pixels</b> in Phase 2, you will receive a <b>share of the monthly rental income</b> generated through our digital advertising screen. This creates a continuous stream of income for pixel owners.</p> <p><b>Monthly Reward Distribution Formula:</b></p> $\text{Total Pixels of All Members} \div \text{Total Monthly Ad Revenue of Digital Screen} = \text{Per Pixel Reward}$ <p><b>Your reward is then calculated as:</b></p> $\text{Your Reward} = \text{Your Held Pixels} \times \text{Per Pixel Reward}$
---	--

## How to Own Pixels?

Our community members can own screen pixels in **two simple ways**:

1. **Buy Pixels:**
2. **Collect Free Pixels:** By joining our airdrop program

## Types of Pixels

Below are the few major types of pixels:

### 1. Open Pixels

Gateway for Token Enthusiasts

Only open pixels are eligible for conversion to tokens at any time. Designed for those eager to seize the early benefits of token ownership.

### 2. Locked Pixels

Tailored for Monthly Reward Lover

Locked for a 6-month period, ideal for those looking to triple their pixels and unlock exclusive benefits and rewards of pixels during Phase 1.

**Locked Pixel Conversion:** After 6 months status of locked pixels changes to open pixels.

### 3. Hold Pixels

Neither Locked nor Open

Hold pixels cannot convert to token or neither gives you any monthly reward. After 90 days they automatically change to open. Before 90 days if you want to you can lock your hold pixels

#### **Important!**

Every month **33%** of your monthly reward pixels are **Open** and **67% are with Hold** status.

## **NO ITO or Pre-sale of Token**

Only way to acquire token is through pixels. Only Open Pixels can convert to tokens

## Pixels Distribution Plan

The circulation supply of our token is directly linked to the number of **open pixels converted to tokens**. To **prevent market flooding** and maintain stability, we have implemented a **controlled monthly distribution plan of pixel distribution**.

There are **only 1 million screen pixels**, below is the **distribution plan of 6 months**:

- 30% (300,000 pixels can be purchased in form of locked and open pixels)
- 70% (700,000 pixels will be distributed free in 6-month airdrop reward series)

### 6-Months Airdrop Series – For 70% Reward Pixels

For this purpose we have introduced a 6-months reward distribution series and **every month only 100,000 pixels** will be distributed to maintain a controlled circulation & token conversion.

Below is the **breakdown of 100,000** monthly distributed pixels:

#### 1. **Locked Pixel Reward: 75% – 75,000 Pixels**

75% of the monthly distributed pixels are reserved as **reward pixels for users who have locked their pixels**. Each participant will receive a portion of the 75,000 pixels based on the following formula:

$$(\text{Your Locked Pixels} \div \text{Total Pixels of All Members}) \times 75,000 = \text{Your Monthly Reward}$$

#### **Example:**

If you own **1000 pixels (locked)**, and the total pixels owned by all members are 150,000, your airdrop reward for holding will be:

$$(1000 / 150,000) \times 75,000 = 500 \text{ pixels (max. 400 capping apply)}$$

#### **Capping Rules:**

Capping means the maximum airdrop reward you can earn during each airdrop depends on the number of locked pixels you have. Below are the capping rules:

- **1 - 25 pixels:** 25%
- **26 - 99 pixels:** 28%
- **100 - 999 pixels:** 33%
- **+999 pixels:** 40%

**Important:**

- The **Total Pixels of All Members** will fluctuate as people **convert pixels to tokens or use tokens to buy more pixels**.
- This means **your monthly reward can increase significantly (even 5x or 10x at times) or decrease** depending on overall participation.

**2. Affiliate Plan Reward: 25% – 25,000 Pixels**

25% (25,000 pixels) will be **distributed through our affiliate program**. Users who build their **team** will **earn pixel rewards** based on their team's **airdrop pixel rewards**.

**Controlled Token Conversion – Max 33,000 Pixels Can Convert to Token Monthly**

- **Only 33% of your monthly reward pixels** are **open for conversion to tokens**.
- The remaining **67% will have a hold status**, ensuring that the market isn't flooded with excessive tokens.
- This means **only a maximum of 33,000 pixels** can be converted to tokens every month.

## CPixels ecosystem

The CPixels ecosystem operates on a **dual-asset model**, combining **Pixels** (ownership units) and **CPIXEL Tokens** (BEP-20 crypto asset) to create a **sustainable and revenue-generating platform**.

### CPixels Economy is powered by:

- **Pixels** – Ownership units that provide revenue-sharing benefits and other opportunities.
- **CPIXEL Token** – The core BEP-20 crypto asset linked to pixel ownership.

## CPIXEL Token

We are not just another crypto token for speculation. Instead, CPixels is designed to provide real solutions in the crypto industry. Pixels serve as a lifetime monthly income source, while also offering a valuable asset for those seeking sustainable growth.

## What Makes Our Token Different?

### 1. FIXED LIMITED SUPPLY

- **Total Supply: 2 Million**
- **Fixed Supply: Pre-minted tokens to prevent inflation**

### 2. NO ITO – NO PRE-SALE

Unlike traditional tokens, **CPIXEL has no Initial Token Offering (ITO) or pre-sale**.

#### **No Pre-Sale Dumping Risk:**

Many projects sell tokens early in pre-sales, which often results in early investors dumping them upon listing, leading to price crashes and harming long-term holders. CPixels avoids this issue entirely. Our distribution is controlled through pixel ownership and conversions.

**CPIXEL tokens can only be obtained by converting open pixels, ensuring:**

- ✓ **No mass dumping of tokens**
- ✓ **Steady and controlled supply**
- ✓ **Long-term price stability and gradual growth**

Our unique **pixel-to-token conversion model** ensures that **tokens are distributed gradually, not dumped in bulk** upon listing, so your investment remain secure and grow gradually.

### **3. CONTROLLED DISTRIBUTION & CIRCULATION SUPPLY**

No Token Flooding

To prevent **market oversupply**, CPixels implements a **structured distribution plan** where a **controlled number of pixels are converted into tokens every month**.

- **Limited Monthly Conversion:** Only a specific number of pixels are converted to tokens each month, avoiding market flooding.
- **Gradual Release Model:** Ensures sustainable growth and long-term value appreciation.
- **Supply control:** The **fixed supply of 3 million tokens** ensures long-term stability.
- **Price protection:** No sudden flooding of tokens keeps supply balanced with demand.

### **4. REAL UTILITY OF CPIXEL TOKEN**

CPixels is not just another speculative asset—it's backed by a **real business model** generating revenue through multiple utilities.

- ✓ **Advertising:** Web3 projects can **rent pixels for ads** using CPX.
- ✓ **Pixel Ownership:** Users can **buy more pixels** with CPX to increase their revenue share.
- ✓ **Club Membership:** CPIXEL tokens will be used for **membership fees** in our investor clubs.

**Pixel to Token Conversion Rate:**

- **Before listing:** 1 Pixel = 1 CPIXEL Token
- **After listing:** The exchange rate will follow **market value**.

## Secure Your Profits in the Volatile Crypto Industry

The crypto market is highly volatile, making it difficult for investors to feel secure. CPixels offers a **stable and reliable solution**—each pixel is always valued at **1 USDT**.

If market conditions seem uncertain, you can **hold your pixels in both phases** and earn a **stable monthly reward for life**, instead of converting them into tokens.

The following sections will outline the detailed benefits of **pixels in Phase 1 and Phase 2**.

### BENEFITS OF PIXELS - PHASE ONE

Along with conversion to token there are multiple benefits if you hold your pixels. Below are the comparison chart between benefits and details of holding pixels in phase one:

Benefits of Pixels	Locked Pixels	Open Pixels
Locking Period	6-Months	No-lock Period
Pixel to Token Conversion	End of Locking	Instant
Daily reward on locked pixels		
Participation in SLE Jackpot		
Reward from Affiliate Program		
Access to Private Group	Only Purchased	Only Purchased

## 1. MONTHLY REWARD ON LOCKED PIXELS

3x Your Pixels in 6-Months Airdrop Locked Pixels Reward Plan

Locking pixels boost your airdrop reward. Get up to 40% airdrop reward on your locked pixels, on every airdrop during our 6-months series.

## 2. PARTICIPATION IN SLE JACKPOT

YOUR CHANCE TO WIN BIG & FAST

When you purchase locked pixels, you automatically get a **free coupon** to participate in our **Single Line Express (SLE) Jackpot**, where you can win **\$1,561**, **\$15,610**, or even **\$156,100** in just a few minutes!

What's unique about the SLE Jackpot?

- **No referrals, no team-building required!**
- Simply **secure an early position** and let the system do the rest.

In this exciting plan, everyone who joins the SLE Jackpot enters a straight, single line —no matter where they're from or who referred them. The rewards are distributed on a **first-come, first-served basis**, making it fair and straightforward for everyone to win big!

The person who comes first will get the reward first

### HOW SLE JACKPOT WORKS?

There are three Jackpot lines based on the number of pixels you own:

Jackpot Line	Min. Pixels to participate	Max Reward
SL-10	10 Pixels	\$1,561
SL-100	100 Pixels	\$15,610
SL-1000	1,000 Pixels	\$156,100

When you purchase pixels, you're automatically placed in the corresponding line. For example, buying 10–99 pixels places you in SL-10, and purchasing 100–999 pixels gets you into SL-100 and so on. **Each line has 5 different rewards below are the details:**

## Just Grab Your Spot and Rest leave on Us!

### How to Secure a Position in SLE Jackpot?

Right now, all positions in the SLE Jackpot lines are **vacant**, giving you the perfect chance to grab a top spot.

We will announce IPO Days for all three SLE Jackpots lines. On each IPO When the countdown ends, a **“Get Position”** button will appear. The first person to click the button will secure the first position, the second person will get the second position, and so on.

### How to Participate?

- On buying **10 locked pixels**, you will receive a coupon to participate in **SL-10 Jackpot**.
- On **100 locked pixels**, you will receive a coupon to participate in **SL-100 Jackpot**.
- On **1000 locked pixels** you will receive **free coupons for all 3 lines**.

## 3. ACCESS TO PRIVATE GROUPS

JOIN OUR PRIVATE TELEGRAM CHANNELS & GET VERIFIED INVESTORS BADGE

Owning **CPixels** isn't just about earning passive income—it also grants you **exclusive access** to our **private investor communities** where **verified investors** collaborate, share insights, and discover the **next big crypto opportunities!**

### How It Works?

When you purchase pixels, you:

- ✓ **Gain entry into our private Telegram groups** of verified investors.
- ✓ **Receive a Verified Investor Badge** on our website.
- ✓ **Engage with like-minded investors** based on your pixel holdings.

### Investor Club Tiers

Your access to private telegram group is determined by the number of pixels you own:

Groups	Access to Telegram Group
<b>Bronze</b> (1 – 99 Pixels)	Silver
<b>Silver</b> (100 – 999 Pixels)	Bronze & Silver
<b>Gold Group</b> (999+ Pixels)	All Three Groups

## Why These Groups Matter?

**Strategic Networking** – Connect **with** serious investors and discover hidden gems.

**Quality Discussions** – Groups are structured to keep discussions relevant and valuable.

**Growth-Oriented Community** – Surround yourself with **investors who match your level**, ensuring meaningful connections and opportunities.

The more **pixels** you own, the **higher your access** and **greater your opportunities**—ensuring **focused discussions and maximum value** for every investor!

## 4. AFFILIATE REWARD

BUILD YOUR TEAM AND EARN 8 LEVELS DEEP

In **Phase 1**, our top priority is **building a strong community** and distributing pixels **as quickly as possible**. To **reward** those who help us achieve this, we have introduced an **exciting affiliate program** where you can earn **free pixels** and **USDT rewards** just by inviting others!

### Pixel Rewards

On Team's Airdrops Pixels

Every month, when your team gets airdrops, you earn up to 30% pixels rewards from their airdrop, 8 levels deep. For example: If your friend gets 100 airdrop pixels, you get 8 pixels as a reward.

### USDT Rewards

On Team's Purchased Locked Pixels

Whenever your team buys locked pixels, you earn up to 30% USDT reward, up to 8 levels deep. For example: If your friend buy 100 locked pixels, you will instantly get \$8 reward.

**Start Building Your Team Today & Maximize Your Earnings!**

## BENEFITS OF PIXELS - PHASE TWO

### Lifetime Passive Income with Pixel Ownership - Phase 2

In **Phase 2**, your locked pixels become a long-term income stream, generating **lifetime monthly rewards**—just by holding them!

#### How Does It Work?

Your locked pixels earn **monthly rewards** from the ad revenue generated by renting out billboard pixels to crypto projects.

- Each pixel is rented for 1 USDT per month.
- The total monthly ad revenue is distributed among all pixel holders.
- Revenue is 100% community-distributed - No staking, no effort—just hold & earn!

#### Distribution Formula:

Monthly Ad Revenue / Total Pixel Held By All Members = Reward per Pixel

#### Example:

If you own **1000 pixels**, and the **total ad revenue for the month is 100,000 USDT**, while the **total locked pixels of all members is 100,000**, your earnings will be:

**(100,000 USDT / 100,000 Pixels) = 1 USDT per Pixel x 1000 Pixels = 1000 USDT**

### What Makes It Even More Exciting?

#### 🚀 Higher Rewards as Circulating Pixels Decrease!

- As people **convert pixels into tokens**, the **number of locked pixels reduces**.
- **Fewer pixels = higher rewards per pixel** for remaining holders.
- Your **reward per pixel could be 10 USDT or even more!**

#### 🔥 Supply & Demand Game-Changer!

- As rewards increase, **more people will want to hold pixels**.
- **Fewer people converting pixels = token scarcity = higher token price**.
- **Holding pixels = more passive income** while tokens **gain value over time**.

## Secure Stable, Lifetime Crypto Income In Volatile Crypto Market

Creating a win-win earning opportunity for both pixel holders and token investors

## CPIXEL Tokenomics

### Token Distribution (Total Supply: 3 Million)

Our tokenomics is designed with the long-term success of our ecosystem in mind. The distribution breakdown is as follows:

- **Airdrop Reward & Pixels Conversion:** 65% (1,300,000 tokens)  
The primary way to obtain tokens is through the **conversion of pixels**. Pixels are the foundation of our platform and each pixel can be converted into tokens starting from January 25<sup>th</sup> 2025.
- **Marketing:** 5% (100,000 tokens)  
Tokens will be allocated for targeted marketing efforts to grow the community and bring in new users and projects.
- **Development:** 5% (100,000 tokens)  
This allocation will ensure that the platform continues to improve, scaling the ecosystem with new features and providing a seamless experience for users.
- **Team:** 5% (100,000 tokens)  
Tokens will be reserved for the core team to ensure they are incentivized to drive the project forward.
- **Liquidity:** 20% (400,000 tokens)  
Tokens for liquidity will be used for initial decentralized exchange (DEX) listings, ensuring that there is enough liquidity for users to buy and sell the token smoothly.

### The Future of CPIXEL

Our goal is not to launch a token and quickly flood the market, but to build **real value** for our community over time. The utility of **CPIXEL** is ingrained in our ecosystem, where token holders benefit from long-term growth through pixel income, advertising, and exclusive benefits. The slow and steady approach to token distribution ensures that this will be a project that thrives in the years to come.

## Project Timeline

### Q1-2025

- Community Building
- Beginning of New Airdrop Series
- Token Launch
- Pixel to Token Conversion
- SL-10 IPO
- Token Listing on Major DEXs

### Q2-2025

- SI-100 IPO
- Collaboration With Projects
- Project Growth & Marketing
- Ventures and Collaborations
- Listing on Major CEXs
- SL-1000 IPO

**Roadmap for Phase 2 will be share soon.**

## Conclusion

CPixels is **not just another token**—it's a **sustainable revenue model**, combining **crypto investments, advertising, and passive income opportunities**. With controlled tokenomics, transparent governance, and real-world utility, CPixels is set to **redefine how crypto investors and projects interact**.
